Thanks David. I am taking off for airport soon – (may be by office to pick up a thing or two on the way) so can you coordinate change with Larry (R7)? ( I need to get packed!)

I am fine with this addition. Phil?

Lisa, Phil dropped off a hard copy of the letter with Sandy but with her focus on Animas she may not get to it. I guess the bottom line is that no matter what, since they are signing, eventually Martin and/or Sandy will need to approve what I think is the “final letter” here.

I am ok with R8's letter but might tweak the end bulleted paragraph to add language in red:

•□□□□□□ We have not had the resources to continue involvement for regulatory purposes with MRRIC for some time. The EPA will attend the August MRRIC meetings to assess our involvement for regulatory expertise that would be provided through our Water Program. We anticipate our involvement in MRRIC will continue to be on an as needed basis and related mostly to our water programs and expertise. This participation is separate from and does not delimit our NEPA role and responsibility to independently review and rate the EIS under Section 309 of the CAA.

Larry,

I had sent the letter to my ARA and deputy Martin Hestmark and Sandy Stavnes to make sure I incorporated their concerns and they were OK with letter. Both have been tied up with Gold King Mine Release since then (the river that was flowing yellow). In fact, I think Martin may be in Durango now. I will send Phil and David a note to see if they can get permission to move it forward.

I am on the response team and headed to Durango later today for what may be two weeks.
